MEDICAL TATTOOING TRAINING

About Medical Training

It's needless to say, medical tattooing is like no other treatment on the market! Medical tattoos are treatments that involve adding pigment to the face and body anywhere that colour is missing from injury, trauma, birth defect, post-surgery or as an alternative to surgery.

It is an emotionally rewarding experience to provide people with life-changing results, and we believe it is the most fulfilling 'job' (if you can call it that!). Working with clients, hearing their stories and feeding off their strengths is something that is truly amazing and that you will be so thankful to be involved in.

This career LITERALLY allows you to change peoples lives with colour.

Medical tattooing offers the final touch for:

- Breast nipple/areola pigmentation
- Breast uplift / reconstructive scars
- Scars and burns
- Scar camouflage
- Scar and burn contracture relaxation
- Trauma and surgical scars
- Skin rejuvenation for the ice pick, boxcar or acne scars and stretch marks
- Re-pigmentation
- Vitiligo pigmentation
- Skin graft re-colouration
- Surgical scars such as facelift, BBL, arm/thigh lift scars
- Self-harm scars
- Facial feature restoration such as cleft lip, missing vermillion border and eye socket definition

ARCH & CO

TRAINING ACADEMY

Here at Arch & Co, we have a very long and reputable client list, including many well-known celebrities and models. Our goal is to provide our clients with the utmost natural outcomes, by using our signature techniques. We would love to teach you how to provide these results for your clients, along with how you can keep them coming back for more.

Our training course isn't your standard training course. It was designed to set you up for success. The course is very personal and tailored to your needs. Our classes are very small to allow for maximum learning potential. You will get LOTS of hands-on tattooing to practise on live models, working on various different scars and skin conditions and LOTS of support.

No question is a stupid question. We will teach you the in and outs of the industry and you will learn from our beginner mistakes.

With our beginner's training, a top of the range kit is included. This includes the best tattooing machine on the market today! We strongly encourage when looking at training courses that you thoroughly research your machine and kits. Along with everything that we personally use in our very own clinic. T

There are no secrets here, you will learn everything we know.

We have an amazing team/ family with us at Arch & Co and we work together not only making difference in life's but helping teach and guide other people to start a new career with a skill that rewards itself.

Feedback - Medical Course Student

"Hey, Just want to say a HUGE THANK YOU to you and Sophie for everything the last few days. Literally had the best time and have learnt so much. I have never been so comfortable on a training course and you girls have made me feel so comfortable and confident the whole way though. Thank you!"

Client - Areola Tattoo

" My mum was so happy She's been crying since we got home because she's so happy with what you have done! Thank you so much!!

Student - Scar camouflage

"Thank you so much for the best training course ever! I've been on so many courses and nothing compares to this! I have loved every minute and gained such a rewarding skill!! I can't thank you enough!"

- Facial & body electrical 3 Course
- Must hold a level 3 or Dr/Nurse status to train in medical needling
- Must complete and pass online bloodborne pathogens test
- Proof will be required

ARCH & CO

TRAINING ACADEMY

Information on our training academy

Our training courses are intense (and fun) and the classes are very small with usually 4 students and two teachers with lots of 1:2:1 support.

The training will take place at our Manchester Academy in Whitefield and will run from approximately 10 – 4/5 pm each day.

You will be sent manuals on the chosen course once the payment of the deposit has been received. You will need to complete some home study in your own time but this will be gone over in-depth on the theory day of your training course. After the theory, you will get the chance to practice on lots of live models with guidance from our team. This course is accredited by ABT.

Finance

We now offer finance to all our students. This is through a company called Kandoo.

To apply you need to fill in the application using the link below. We cannot give any guidance on the application as it is solely done through Kandoo themselves. Once the finance has been confirmed, the funds will be transferred directly into your account. From there you can get in touch with us to make and secure your payment on a chosen course.

Begin your application by clicking the link below or on the Kandoo home page. You will fill application process online. If you wish to proceed, Kandoo will forward a contract that can be electronically signed and a full application form that can be completed online (this takes about 5 minutes).

On completion you will receive an instant response with offers from a number of banks or lenders. It is up to you to select the best deal for yourselves. Once chosen you will be sent to the lender directly. The lender will usually pay out within 24-48 hours of the completed application.

TRAINING ACADEMY

1:2:1 ONE DAY MEDICAL MASTERCLASS

This course was created for already trained and certified medical tattoo artist who are wanting to update their skills or gain more confidence

£2000 inc VAT

MEDICAL TATTOOING TRAINED & CERTIFICATION NECESSARY

Class Learning:

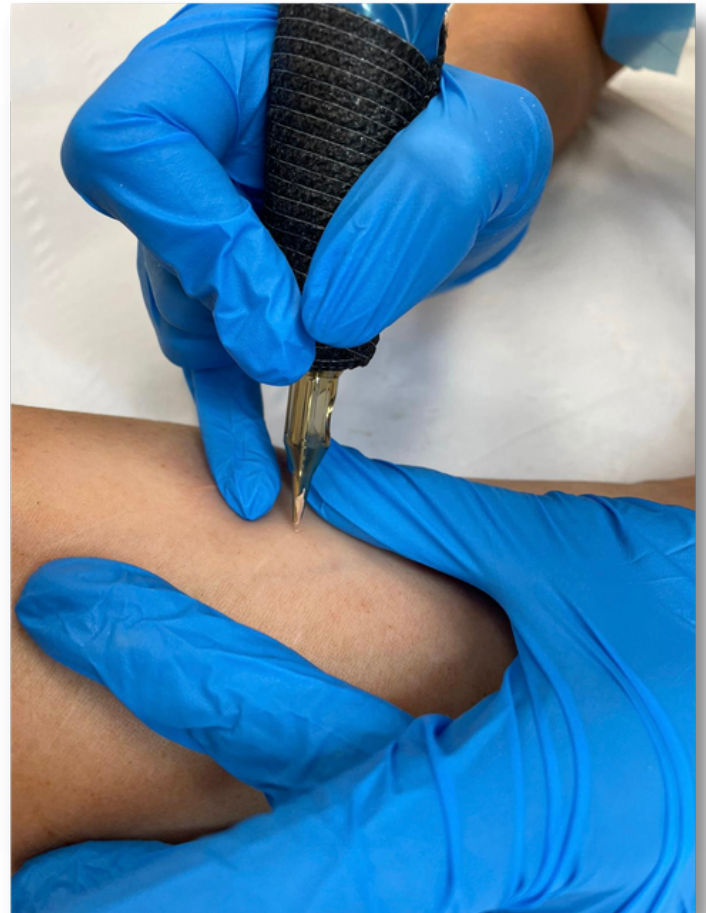

This day can be planned around your specific needs. If you are struggling with something in particular, please let us know and we can make a plan for a masterclass day specifically suited to your needs.

For example:

If you wanted to learn how to create height and realism when tattooing nipples or gain more of an insight into the theory side of medical tattooing we can work on these areas specifically for you.

If you want to sit and observe us working or, you want to work on a model together or, you would like to work on a model with Sophie guiding you step by step we can plan this for you.

We can plan any lesson to suit your needs – just let us know.

Our courses are accredited with ABT and our students get 10% discount with them when training with us
