MEDICAL TATTOOING TRAINING

About Medical Tattooing

It's needless to say, medical tattooing is like **no** other treatment on the market! Medical tattoos are treatments that involve adding pigment to the face and body anywhere that colour is missing from injury, trauma, birth defect, post surgery or as an alternative to surgery.

It is such a rewarding and emotional experience to provide people with life changing results and it is in our opinion, the most fulfilling 'job' around (if you can call it one!). Working with clients, hearing their stories and feeding off their strengths is something that is truly amazing and that you will be so thankful to be involved in.

This career LITERALLY allows you to change peoples lives with colour.

Medical tattooing offers the final touch for:

- Breast nipple/areola pigmentation
- Breast uplift / reconstructive scars
- Scars and burns
- Scar camouflage
- Scar and burn contracture relaxation
- Trauma and surgical scars
- Skin rejuvenation for ice pick, boxcar or acne scars and stretch marks
- Re-pigmentation
- Vitiligo pigmentation
- Skin graft re-colouration
- Surgical scars such as face lift, BBL, arm/thigh lift scars
- Self harm scars
- Facial feature restoration such as cleft lip, missing vermillion border and eye socket definition

ARCH & CO TRAINING ACADEMY

Sophie is a VTCT approved trainer and all of our training courses are all accredited with ABT. Sophie has a teaching background (having been a primary school teacher for a number of years), before venturing off into the crazy world of SPMU.

It 's needless to say, Sophie is extremely experienced when it comes to guiding you through this journey. She will put you at ease from the get go and bring out your very best potential when guiding you into this new career or developing a new skill set.

Here at Arch & Co, we have a very long and reputable client list, including many well known celebrities and models. Our goal is to provide our clients with the upmost natural outcomes, by using our signature techniques. We would love to teach you how to provide these results for your clients, along with how you can keep them coming back for more.

Our training course, isn't your standard training course. It was designed to set you up for success. The course is very personal and tailored to your needs. Our classes are small to allow for maximum learning potential. You will get LOTS of hands on tattooing practice and LOTS of support. No question is a stupid question. We will teach you the in and outs of the industry and you will learn from Sophie's beginner mistakes. With our beginner training, a top of the range kit is included. This includes the best tattooing machine on the market today! Along with everything that we personally use in our very own clinic. There are no secrets here, you will learn everything we know.

Starting a new career can be very daunting – Sophie left her training with a small black case of equipment and a hefty £10,000 loan! She rented a beauty room, practiced until she could no more and made sure her work was good & consistent. She now has her very own clinic and training academy in Manchester and a fabulous clientele. With hard work, dedication and the right training and support, you CAN achieve this too and we would love to share this journey with you.

POTENTIAL EARNINGS

Based on an average scar treatment plan, priced at £800 spread over 4 sessions.
On average, medical treatments take around 2 hours to complete. 9 new treatments is an 18 hour working week.

1:2:1 ONE DAY MEDICAL MASTERCLASS

MEDICAL TATTOOING TRAINED & CERTIFICATION NECESSARY

This course was created for already trained and certified medical tattoo artist who are wanting to update their skills or gain more confidence

£1750 inc VAT

Class Learning:

This day can be planned around your specific needs. If you are struggling with something in particular, please let us know and we can make a plan for a masterclass day specifically suited to your needs.

For example;

If you wanted to learn how to create height and realism when tattooing nipples or gain more of an insight into the theory side of medical tattooing we can work on these areas specifically for you.

If you want to sit and observe Sophie working or, you want to work on a model together or, you would like to work on a model with Sophie guiding you step by step we can plan this for you.

We can plan any lesson to suit your needs – just let us know.

Our courses are accredited with ABT and our students get 10% discount with them when training with us.
